## POSITION

Associate Professor in Department of Justice, Law and Society, California University of Pennsylvania

## EDUCATION

### *Ph.D.*

**2004**

State University of New York at Buffalo (SUNY, Buffalo)

Buffalo, New York

■ Major: Informatics: Information Communication Technology & Computer Mediated Communication

**Dissertation: Comparison across the reference frame: Rotation of Galileo spaces with inconsistency objects. An example of comparison of user's perception and online legal policy**

This dissertation examines the cognitive differences that users see between their own views of online privacy and security and the policies of e-retailers by multidimensional mathematical presentation.

### *Masters of Science Information Technology*

**1996**

Rochester Institute of Technology (RIT)

Rochester, New York

■ Major: Information Technology

**Thesis Project: Forensic Digital Imaging**

### *Bachelor of Science*

**1988**

Central Police University – Taiwan

Taoyan, Taiwan

■ Major: Forensic Science

## CERTIFICATION

- **ACE Computer Forensics Certification (AccessData Certified Computer Examiner)** (June,2010)
- **Certificate:** Law Enforcement and Emergency Services Video Association International (LEVA: 40 Hours): Photography Comparison, Indianapolis, IN (Dec.,2009)

**July 1988-September 2001**

Criminal Investigation Bureau

Taipei, Taiwan

Police have a centralized organization in Taiwan, and the Criminal Investigation Bureau basically constitutes the national detective division. Accomplishments:

- Successfully adapted forensic photography into digital imaging domain
- Developed digital techniques for enhancement and restoration of fingerprints, as well as video images from surveillance and ATM cameras
- Expanded the use of digital techniques in the Criminal Investigation Bureau. Assigned and supervised work crews to hundreds of nationwide criminal cases in forensic identification in photos or video images. Roughly ten percent of the cases handled by me involved computer crime. In general, my cases involved crime scene investigations, detailed identification reports, and resulting in criminal prosecutions and convictions. My subordinates and I solved hundreds of cases involving kidnapping, robbery, homicide, and hit-and-run through the enhancement of surveillance video tapes
- Provided forensic digital imaging services to national police forces, courts and ministries
- Trained many police officers nationwide to update their knowledge of forensic photography and digital imaging, including such topics as the installation of surveillance cameras to meet requirements in law enforcement
